

**CERTIFICATION OF FINAL ENVIRONMENTAL IMPACT REPORT
FOR THE
1215 O STREET OFFICE BUILDING PROJECT**

The 1215 O Street Office Building Project (STATE CLEARINGHOUSE NUMBER 2016122026) includes the demolition of the vacant CDFA Annex building and construction of a new office building at the same location. The new building would be approximately 300,000 to 350,000 gross square feet with a maximum height of 150 feet and would primarily provide State office space, but would include some limited underground parking, ground-level commercial space, and a fitness center for State employees. The new building would be connected to the State-owned Central Plant for heating and cooling. Photovoltaic solar panels would be installed on the roof of the building to provide power to the new building. The building would have a proposed occupancy of approximately 1,000 to 1,200 employees to address the critical State office space deficiencies in downtown Sacramento, California.

In addition to the Draft Environmental Impact Report (EIR), the Final EIR for the Project consists of revisions to the Draft EIR, a list of persons and agencies commenting on the Draft EIR, comments received on the Draft EIR and responses to comments.

The Department of General Services (Department) is the lead agency for the Project. The Final EIR was presented to the decision-making body of the Department and has reviewed and considered the information contained in the Final EIR for the project. In accordance with Section 15090 of California Environmental Quality Act (CEQA), the Department hereby certifies that the Final EIR for the 1215 O Street Office Building Project has been completed in compliance with the California Environmental Quality Act and reflects the Department's independent judgement and analysis.

DANIEL KIM, Director
California Department of General Services
